

DEATH CERTIFICATE

I hereby certify that Occupy Toledo, born October 10, 2011, has died on this day, April 1, 2012. The immediate cause of death was apathy. The underlying causes of death included: 1) an atrophied brain due to an overexposure to TV news and infotainment, talk radio, and so-called "reality" TV; 2) learned helplessness, due to an enlarged gullibility, making it susceptible to corporate propaganda and so-called political pundits; 3) a weakened constitution due to lack of exercising freedoms and widespread metastases of planetary consumption; and lastly, 4) pure exhaustion from running on the treadmills of trying to earn enough to maintain a decent household and fend off crushing debt.
